

The National Science Foundation announced the availability of funding for the Research Coordination Networks (RCN) program (*Catalog for Federal Domestic Assistance number: 47.041*). The purpose of this funding is to advance a field or create new directions in research or education by supporting groups of investigators to communicate and coordinate their research, training and educational activities across disciplinary, organizational, geographic and international boundaries. RCN provides opportunities to foster new collaborations, including international partnerships, and address interdisciplinary topics. Innovative ideas for implementing novel networking strategies, collaborative technologies and development of community standards for data and meta-data are especially encouraged. RCN awards are not meant to support existing networks; nor are they meant to support the activities of established collaborations.

The application deadline is March 4, 2013

Eligible applicants include nonprofit organizations, colleges and universities, independent museums, observatories, research labs, professional societies and similar organizations. To request an application package, visit

www.grants.gov
